

Energy Conscious Blueprint Lighting Designer Incentive

ENERGIZE CONNECTICUT

This incentive goes directly to the lighting design team to reward their efforts to achieve lighting energy savings while maintaining quality lighting design. The goal of both the program and the incentive is to have a strategic and meaningful impact on lighting projects, ensuring that energy efficiency is considered from the beginning and is supported until the end of a project. These lighting design solutions will have greater persistence because they are designed by professionals who have balanced the human needs of the project with the performance requirements of the lighting system, creating quality designs that are “right-sized” for the project by being energy efficient.

- Lighting Designer Incentive (LDI) is offered to lighting design teams for qualifying New Construction/ Major Renovations or Existing Buildings, Performance Lighting projects, or projects qualifying under the Sustainable Office Design (SOD) program.
- LDI is not available for projects that participate in the Eversource Energy Conscious Blueprint Whole Building approach. A separate Design Team Incentive is available for project teams of qualifying Whole Building projects. Ask your Eversource energy efficiency consultant for details.
- LDI is a sum equal to 20% of the customer incentive offered for a project, up to a maximum of \$15,000 per project.

Lighting Designer Qualifications

LDI will be paid to the lighting design team to reward their design and modeling efforts to achieve deep lighting energy savings.

- The lighting design team is responsible for laying out and selecting fixtures, and may not receive compensation on or related to the sale of lighting products or work for an organization that receives revenue related to the sale of lighting products.
- The lighting designer must have at least one of the following qualifications:
 - Lighting Certified (LC): successful completion of the National Council on Qualifications for the Lighting Professions Lighting Certification Examination
 - CLEP: certification from the Association of Energy Engineers
 - IALD: professional membership in the International Association of Lighting Designers
 - CLD: status as an IALD-sponsored Certified Lighting Designer

LDI Payment Process

LDI will be paid in two installments: 50% upon pre-approval of the project when the letter of authorization is issued and 50% upon Eversource’s confirmation of installation, which is the same time Eversource makes the customer incentive payment. Eversource will make the payment to the lighting design team lead. The lighting design team lead may choose to split the incentive with additional parties. For the first LDI installment, the lighting design team shall submit the attached Lighting Designer Incentive Worksheet and a W-9.
