Large C&I Workflow Goals

Summary of Opportunities

Scheduling, executing, and documenting inspections can add up to a month to our workflow. Focus on Pre-approval SLA timeline.

By scheduling inspections while other tasks are being done, we can accelerate throughput by up to a month for the projects we inspect

Post Inspections typically occur after the Contractor has left Customer site.

Conducting inspection while the contractor is on-site will help schedule and conduct the inspections

It will also allow for corrective action
