

Commercial and Industrial: New Construction or Major Renovation

PATH 4: SYSTEMS

Heating

Lighting

Cooling

Engage with Eversource and United Illuminating (UI), Southern Connecticut Gas (SCG), and Connecticut Natural Gas (CNG), subsidiaries of AVANGRID, Inc. (The Companies) to receive both guidance and financial incentives for incorporating energy-efficient equipment and systems into your small to large-sized building project.

For simpler, smaller projects, that incorporate energy efficient equipment and systems in their design. A wide variety of projects types are eligible to participate in this pathway, including fit outs and parking garages. No model or energy analysis is required.

Project Eligibility Requirements*

1. No Minimum or Maximum size requirements
2. Engage with the Companies before the purchase and/or installation of equipment
3. Energy Efficiency Consultant must receive the following documentation:
 - Project Intake Form
 - Latest Architectural Drawing Set Mechanical, Electrical, Plumbing Schedules
 - Specification sheets for all energy conservation measures
 - All projects that include lighting must submit a COMcheck*

For more information on **Sustainable Office Design** program please contact your Eversource or UI program implementer.

*Lighting design teams that include Networked Controlled Lighting, or Sustainable Office Design (SOD) may be eligible for the lighting designer incentive

PATH BENEFITS

By partnering with The Companies, you will receive:

- Guidance throughout design to identify the most cost-effective ECMs
- Custom incentives for each ECM included in the project
- Annual energy cost savings as soon as your building is operational

Summary of Incentives		
Customer Incentives		
Incentive Type	Measures	Rate
Prescriptive Incentive	Lighting	See the ECB Incentive cap sheet on EnergizeCT.com for latest rates
	Networked Lighting Controls	
	Building Envelope	
	Unitary HVAC (RTU, AC, HP, VRF)	
	High Efficiency Chillers	
	Energy Recovery	
	Demand Control Ventilation	
	Variable Flow Kitchen Hood	
	DHW Heaters	
	Condensing Boilers	
Custom Incentive		\$0.40/kWh or \$1,000/ Summer Peak kW \$6.00/ccf (Capped at 95% of Incremental Cost)
Multi-End Use Incentive		Up to \$20,000
Lighting Designer Incentive		
LIGHTING DESIGNER INCENTIVE	PROJECT CAP	PROJECT QUALIFICATION
Equals 20% of the total interior lighting incentive in the project	\$15,000	<ul style="list-style-type: none"> • Only lighting designers who have obtained LC, CLEP, CLD certifications or are current members of IALD are eligible. • The lighting designer must design, engineer, or install, and not profit solely from the sale of the lighting.
